Blackboard Classes:

Media Tech I: A semester long class for high school students that mixes information literacy and technology skills, while also preparing students for work in a library

Media Tech II: A continuation of Media Tech I, this class is for students who have successfully completed Media Tech I and would like to continue learning new ways to use media and technology to become better students. This class also serves as real life experience for work in a library outside of school

Guest login for Media Tech I and Media Tech II:

User name: has.g.mbarile

Password: has.g.mbarile

When you login with the guest login above, you will only see what is currently available to my students as assignments and discussion boards. During Winter break and after, I will open all of the assignments and discussion board items for both classes so that you can copy any of the assignments you wish. Then in January, we begin a new semester and only open a few assignments at a time. In June, we have all of the assignments open again. The discussion board has a lot of student examples posted.
